

July 5, 2024

To: H.E. Yoweri Kaguta Museveni,
The President, Republic of Uganda,
Office of the President,
Kampala (U).

Dear Your Excellency,

RE: STOP OIL EXTRACTION IN MURCHISON FALLS NATIONAL PARK

1. We are Ugandan oil host community members, youth, civil society organisations (CSOs), tour and travel operators, fisherfolk and small-scale farmers among others. Some of us are working to promote human rights, biodiversity conservation and climate action, while some of us are concerned by the risks presented by oil extraction in Uganda on our or others' livelihoods.
2. We are joined in writing this petition to you by Tanzanian and Congolese cross-border communities, youth and CSOs that share key ecosystems such as Lake Albert, Lake Edward and others in the Albertine Graben.
3. While we appreciate your able leadership, we are writing to you today with heavy hearts because of the immense environmental destruction that is being seen on account of oil and other activities in the Albertine Graben in Uganda. We are especially saddened by reports that TotalEnergies E&P (U) B.V. wants to deploy a second oil rig to extract oil from Murchison Falls National Park¹. The company is already operating an oil rig to drill the Jobiri wells under the Tilenga oil project in the park.
4. Your Excellency, as you are aware, your government made commercial oil discoveries in the pristine, ecosensitive and biodiverse Albertine Graben in Uganda in 2006.

¹ Daily Monitor (2024); *Fight over Total's \$4bn oil works inside Murchison Park*:
<https://www.monitor.co.ug/uganda/news/national/fight-over-total-s-4b-oil-works-inside-murchison-park-4664272#story>

5. Your government, which is working alongside TotalEnergies and China National Offshore Oil Corporation (CNOOC), decided to commercialise these finds through the Tilenga, Kingfisher and East African Crude Oil Pipeline (EACOP) projects.
6. The decision to extract oil and build the EACOP including extracting oil from 130 oil wells in Murchison Falls National Park under the Tilenga oil project as well as from tens of wells from Lake Albert under the Kingfisher oil project was widely criticized. Why?
7. Your Excellency, Murchison Falls National Park alongside the Bugungu and Karuma Game Reserves remain one of Uganda's most important conservation areas. Collectively known as the Murchison Falls Protected Area and measuring 5,045 sq.km², the park and its associated game reserves were home to 144 mammal, 556 bird, 51 reptile, 51 amphibian and 755 plant species in 2015². This makes the park an important biodiversity conservation area.
8. Unfortunately, key biodiversity in the park is reported to have decreased thanks to climate change impacts such as flooding that destroyed habitats as well as breeding grounds³ for wildlife such as hippopotami and crocodiles. Aerial surveys are reported to have confirmed the reduction in biodiversity⁵.
9. Oil activities in Murchison Falls National Park, and we will do well to remember that the burning of fossil fuels such as oil is responsible for the climate crisis that is hurting biodiversity conservation efforts, are further putting a strain on conservation efforts. How so?
10. Research to be published by Africa Institute for Energy Governance (AFIEGO) in July 2024 shows that elephants, which are known for their sensitivity to vibrations, have been negatively impacted by oil activities in the park. Biodiversity experts and tour guides report that the elephants

² Plumptre, J.A., Ayebare, S., Mudumba, T. (2015); *Biodiversity surveys of Murchison Falls Protected Area*: [https://www.researchgate.net/publication/283122588 Biodiversity surveys of Murchison Falls Protected Area](https://www.researchgate.net/publication/283122588_Biodiversity_surveys_of_Murchison_Falls_Protected_Area)

³ The Elephant (2023); Climate change flooding affecting reproduction rate of crocodiles at Murchison NP: <https://theelephant.co.ug/climate-change/flooding-affecting-reproduction-rate-of-the-nile-crocodiles-at-murchison-np/>

feel the vibrations from the Jobiri oil rig that is operating in the park in their feet. As a result, communities report that the elephants are increasingly leaving the park for community lands. They destroy gardens and killed five people between 2023 and April 2024⁴.

11. The research also shows that various stakeholders including biodiversity experts and tour guides are worried about the impact that oil rigs, well-pads, oil roads and other infrastructure could have on biodiversity. Light pollution from the rig has been implicated as a risk to the conservation of nocturnal wildlife such as lions, leopards, various bird species and others. Paved oil roads in the park have been identified as risk factor for increasing poaching, which is already affecting the conservation of wildlife such as hippopotami⁵.
12. Your Excellency, the increased human presence in the park has also been implicated as a conservation risk for shy and nervous wildlife such as waterbuck and bushbuck (*Engabi* in Runyoro and Luganda). This wildlife, which is not only culturally important as it is the bedrock of clan systems in Buganda and elsewhere, is also important for providing an ecological balance that humanity needs to survive. The increased human presence in the park makes this wildlife jittery, and there are worries that it could migrate. Worth noting is that the Tilenga oil project is named after the bushbuck, an animal that is severely threatened by the project. What an irony, Your Excellency!
1. Yet the above are not the only concerns Your Excellency. The fact that wellpads and an oil pipeline called the Victoria Nile Crossing are being developed a few metres from or will affect the Murchison-Falls Albert Delta Ramsar Site is concerning.
13. The Murchison Falls-Albert Delta Ramsar site, which is found in the park, is a wetland of international importance. The Ramsar site is not only an Important Bird Area (IBA) and Key Biodiversity Area (KBA) that is home to endangered species such as the Shoebill, it is also an important

⁴ Nile Post (2024); *Buliisa leaders threaten demo over animal attacks*:

<https://nilepost.co.ug/nbrb/194899/buliisa-leaders-threaten-demo-over-animal-attacks#:~:text=At%20least%20five%20people%20are,human%20life%2C%20property%20and%20crops>

⁵ National Geographic (2023); *Hippos had found refuge in Uganda's national parks. But that may be changing.*

<https://www.nationalgeographic.com/animals/article/hippos-poached-in-ugandas-national-parks>

spawning ground for the Lake Albert fisheries. Lake Albert is one of Uganda's biggest fisheries, or sources of fish, accounting for 43% of the country's fish catch in 2018.

14. Your Excellency, you have variously championed tourism, noting that it is important for Uganda's economic growth. In your 2023 State of the Nation Address, you informed Ugandans that the tourism sector had earned Uganda US\$ 1.047 billion by February 2023. This was equivalent to 59% of all the services export receipts.
15. Murchison Falls National Park plays a critical role in Uganda's tourism sector as the park received the highest number of tourists between 2019 and 2023. According to the Ministry of Tourism, Wildlife and Antiquities, the park received 141,335 visitors, equivalent to 36.4% of the 387,914 tourists that visited Uganda's ten national parks in 2023. Further, in 2022, the park received 146,649 visitors, accounting for 39.8% of the 367,869 tourists that visited Uganda's national parks.
16. Yet it is this park, which is also critical for the million dollar fisheries industry in Uganda, that is being decimated by oil-induced climate change, and where further destruction is ongoing due to oil activities in the park.
17. As you may be aware, TotalEnergies E&P (U) B.V. wants to put more pressure on the park by deploying a second rig in the park. This is unacceptable, and we commend the Petroleum Authority of Uganda (PAU) for refusing the second deployment of a rig in the park.
18. Unfortunately, reports indicate that Total is sweet-talking you to allow them to deploy the rig. It would be most unfortunate if you allowed them to set up a second oil rig in the park.
19. We know that you love our country, and are a champion of biodiversity conservation as evidenced by your support for the restoration of wetlands such as Lubigi in Kampala. Murchison Falls National Park is a shadow of its former self due to the development of oil infrastructure in the park.
20. The time is now for you to protect the park and through this petition, the undersigned are calling on you to stop Total's planned deployment of

a second oil rig in Murchison Falls National Park and to stop the ongoing oil activities in the park.

21. The communities that are signatory to this petition and have been affected by elephant invasions are also calling on Uganda Wildlife Authority (UWA) to compensate them for the crops and lives of loved ones that have been lost. Many remain uncompensated because UWA says that it lacks funds.
22. You are an able leader and we know that you will prioritise people and biodiversity as well as sustainable economic activities such as agriculture, fisheries, tourism and others over fleeting oil revenues.
23. We thank you for listening to us Your Excellency and we will be looking forward to a positive response from you. The undersigned signatories may be contacted through Africa Institute for Energy Governance on afiego@afiego.org.
